GaragePoxyTM

**Turn Your Old, Stained &
Pitted Garage Floor Into
a Beautiful Showroom Floor**

martenscorp.com

**Imagine a Bright,
Clean Garage That
Becomes an
Extension
of Your Home**

GaragePoxy will not only protect and beautify your garage floor, it will transform your garage to a bright and beautiful auxiliary area for entertainment...a room you will be proud to show off.

The Advantages of an Epoxy Coated Floor

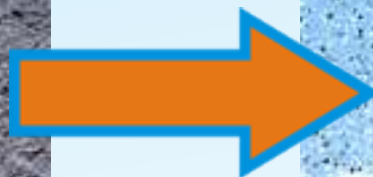

Used exclusively in commercial applications for its toughness and durability, epoxy floor coatings are now popular in residential garage applications.

Homeowners can now enjoy a spectacular show room quality floor in their own garage. GaragePoxy will eliminate pits and cracks providing a smooth, chemical and salt resistant surface that is very easy to clean and will look good for many years to come.

MARTENS Will Turn Your Garage Floor From This To This

Before

- ❌ Pitted Surface
- ❌ Unsightly Cracks
- ❌ Salt Damage
- ❌ Oil & Chemical Stains
- ❌ Never Looks Clean

After

- ✅ Show Room Quality Surface
- ✅ No Unsightly Cracks
- ✅ Resists Salt Damage
- ✅ Resists Oil & Chemical Stains
- ✅ Easy to Keep Clean

Let the MARTENS Pros Install Your Garage Epoxy Floor

Your Garage Will Look so Good, You'll Want to Move In.

Nothing compares to the beauty and strength of an epoxy coated concrete floor installed by MARTENS.

The difference will be so remarkable, you won't believe it's a garage.

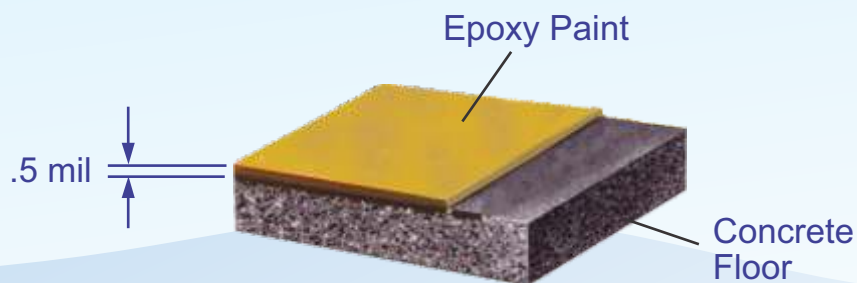

Go From Drab to FabSM

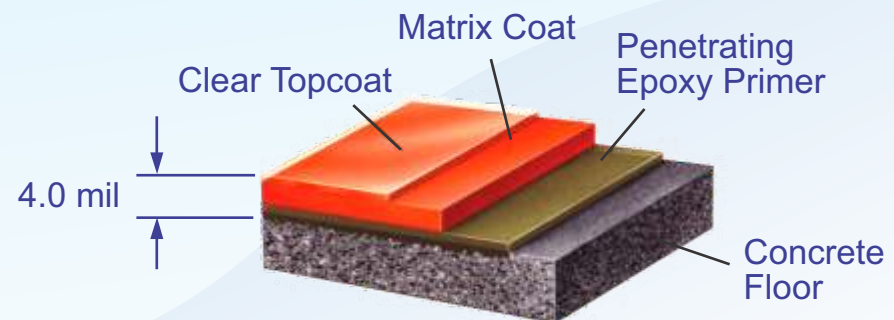

The GaragePoxy Difference

There is a very big difference between other Epoxies and MARTENS GaragePoxy floors. MARTENS will install a heavy-duty, industrial rated epoxy floor containing 100% resins, resulting in a much thicker, more durable coating that will not only protect your concrete floor from deterioration but look beautiful for many years to come.

Dot it Yourself Epoxy Coating

MARTENS GaragePoxy Coating

Let the MARTENS Pros Install Your Garage Epoxy Floor

STEP 1 - Preparing the Concrete Floor

Shot Blasting

For a long lasting installation a clean floor is very important. Our automated shot blaster removes all dirt and chemical residue right down to bare concrete.

Edge Grinding

We follow up with an edge grinder, making sure the epoxy coating will bond right up to the edge of you floor.

STEP 2 - Filling Pits, Cracks and Leveling

leveling the Floor

Some floors may have major surface damage spots that require repair and leveling. We use a high tech cementitious composite epoxy, resulting in a very strong repair, stronger than the original concrete.

Filling Seams and Cracks

Most concrete floors have cracks and pits from years of wear and salt erosion. We fill them with a thick coat of epoxy to eliminated these unsightly imperfections.

STEP 3 - Sealing With a Primer Coat

A Primer is Used for Sealing and Bonding

After checking for vapor and moisture transmission, a primer sealer coat is applied. This coat prevents vapor transmission and provides a better bond for the color coat.

We Cover Every Square Inch

We don't take short cuts and we pay attention to detail. Every square inch of your floor is covered with the sealer primer, even the hard to get to spots.

STEP 4 - Color Coat and Color Flakes

The Color Coat is Rolled On.

Unlike other epoxies, GaragePoxy color coat is a thick layer with 100% epoxy solids. There are many standard colors to choose from including custom colors.

Spreading Color Flakes

For assured adhesion, quartz aggregate or color flakes are added while the color coat is still wet. The flakes provide that desired textured look. Flakes are available in many textures and colors.

Many Colors and Options to Choose From

Do-it-yourself epoxy kits sold in stores only offer a choice of two or three colors.

With Martens GaragePoxy there is a wide range of solid or textured colors to choose from, even custom color blends and luminescent colors. The color possibilities are endless.

Customize Your Floor With a Graphic

As an option, we can personalize your garage floor with a custom graphic. It can be your favorite team or car logo or any other graphic you choose.

The graphic is embedded in the epoxy coating and protected with a durable, transparent top coat.

Why Choose MARTENS For Your Epoxy Floor

- 4 More Than 25 Years in Business
- 4 A Leading Commercial and Residential Contractor
- 4 Extensive Epoxy Floor Expertise
- 4 Guaranteed Performance
- 4 Commercial Grade Coatings

Let the MARTENS Pros Install Your Garage Epoxy Floor

MARTENS Guaranteed Performance

As a MARTENS customer, you will receive the highest quality workmanship and the best materials available on the market, we guarantee it.

Our reputation as a quality contractor is very important to us. That is why we stand behind our work and make sure you have the best epoxy floor installation. Should any problems arise, we will promptly correct the situation.

MARTENS is Fully Insured

Why is it important to you for a contractor to be insured? Unexpected on the job events occasionally happen that may result in property damage or injury. For your protection, a reputable contractor will always carry insurance. Should anything happen, rest assured, with MARTENS you are fully protected against any damage, loss, or injury.

Improve the Value of Your Home

A garage with an epoxy coated floor adds beauty and functionality to your home by providing additional space that can be used for many things other than parking your car.

This added flexibility will make it more attractive to buyers thereby improving the market appeal and value of your home.

Considering a Garage Make Over?

If a garage make over is in your plans, nothing will make it look more attractive, and provide long lasting beauty and protection for your garage floor than a GaragePoxy installation by MARTENS.

With hundreds of colors and texture combinations to choose from, whatever your theme, we can easily match or create a color scheme and texture style to fit your desired decor.
